Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (5,789,716).

Wang teaches a vibrating switch comprising:

an isolating housing 2 (figs. 3-5);

a spring 4;

a conductive plate 7;

a metal support plate 6;

a first and second pins 62 and 74, respectively, the pins extending outside the housing 2;

and

vibration causes the spring contact to electrically contact the conductive plate.

Regarding claim 2, Wang teaches a bottom plate 5 for the housing 2.

Regarding claim 3, please see fig. 3 of Wang.

Regarding claim 5, Wang teaches a denser free end 41. Please see fig. 3.

Regarding claim 6, Wang teaches the first pin integrally formed with the conductive plate and the second pin integrally formed with the support plate. Please see fig. 3 of Wang.

Regarding claims 7-9 and 11, please refer to the teaching of Wang as stated above.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang.

Wang teaches the claimed invention except for the having the first and the second pins at the opposite sides of the housing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have altered the location of the pins in respect to the housing sense it appears that the invention would perform equally well with the pin location of Wang.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see the attached PTO-892.
